

## CLINIC HIGHLIGHTS

### May 2022

I was so excited to see the April financials and that the clinic losses were down. Oncology (-\$103,410) and Home Health (-\$96,491) are included in those numbers, but the remaining clinics were able to cover the clinics that had losses. I am so proud of the work of the clinic managers, providers and staff. We are making great headway! Delta Health Family Medicine and the Delta Health Pain Center have had a positive month end every month in 2022. It's a great streak to be on.

We are getting closer to digital check in for patients at all of our primary care clinics, PCMH recognition and we are ready for our RHC surveys for DFM and WEH. Pediatrics continues to see increased patient volumes and build relationships with the community.

Spring wind is here and it's blowing us into great success!

Respectfully,

Vickie
